

Lead Curtains

Ultraray Radiation Protection produces protective Lead Curtains for various applications. Tailored to our client's specifications, we offer several options for your needs.

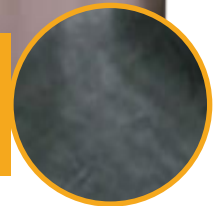

Curtains are ideal for areas where secondary or low-level radiation is present. Optional hardware (track and trolleys) and grommets are available for doorway or room divider curtains.

Available in many colours in both nylon or waterproof vinyl-covered, Lead Curtains offer protection levels from 0.5mm to 2.0mm lead equivalency.

Accessories such as velcro, buckles, rings or strap fasteners can be attached to connect multiple curtains. We offer other options (logos, embroidery, pockets and screening) to meet your requirements.

0.5mm to
2.0mm Lead
Equivalency
