

ULTRARAY
RADIATION PROTECTION

Switchable Lead Glass

Provides instant switchable privacy for an opaque, milky white, laminated panel to become transparent with the application of an electrical current to an embedded layer of liquid crystal particles.

An array of switching options are available from a basic single-pole/single throw switch to advanced integration into home automation systems.

PM1210 Power Module features a standard 4" x4" double-gang plate face, with an extended mounting ring for easy installation to mount to any standard double-gang junction box.

We're ready to earn your business and exceed your expectations.
